

# Supplies — User Manual

**Modul:** Supplies (Office Supply & Consumable)  
**Versi dokumen:** 1.1  
**Terakhir diperbarui:** 2026-09-02  
**Bahasa UI:** English (label menu, kolom, status)  
**Referensi teknis:** [docs/SUPPLIES\\_DESIGN.md](#), [docs/adr/0012-supply-workbook-cutover-seed.md](#)

## 1. Tentang modul ini

Modul **Supplies** mengelola persediaan kantor dan barang consumable di ARKA HERO:

- **Catalog** — daftar barang (kode, nama, satuan)
- **Stock In** — pencatatan barang masuk ke gudang/project
- **Stock Out** — pencatatan barang keluar (pemakaian)
- **Supply Order** — permintaan pembelian / pengadaan ulang barang

Stok dihitung **per Project** (bukan gudang terpisah). Saldo akhir = Stock In – Stock Out untuk item tersebut di project yang dipilih.

**Kategori default:**

| Kategori      | Prefix kode | Contoh         |
|---------------|-------------|----------------|
| Office Supply | GAA         | GAA001, GAA002 |
| Consumable    | GAC         | GAC001, GAC002 |

## 2. Siapa menggunakan apa?

| Peran             | Menu utama                                    | Kegiatan                                                              |
|-------------------|-----------------------------------------------|-----------------------------------------------------------------------|
| GA / HCS          | GAMMA → Supplies                              | Kelola catalog, Stock In/Out, semua Supply Orders, dashboard, laporan |
| Karyawan          | My Features → My Office Supply Orders         | Buat permintaan ATK (Office Supply) untuk project aktif               |
| Approver          | Approval Requests                             | Menyetujui / menolak Supply Order yang diajukan                       |
| Admin master data | Master Data → Supplies Data → Item Categories | Kelola kategori barang                                                |

Akses menu bergantung **permission** role Anda. Jika menu tidak muncul, hubungi administrator.

## 3. Navigasi menu

## GAMMA → Supplies

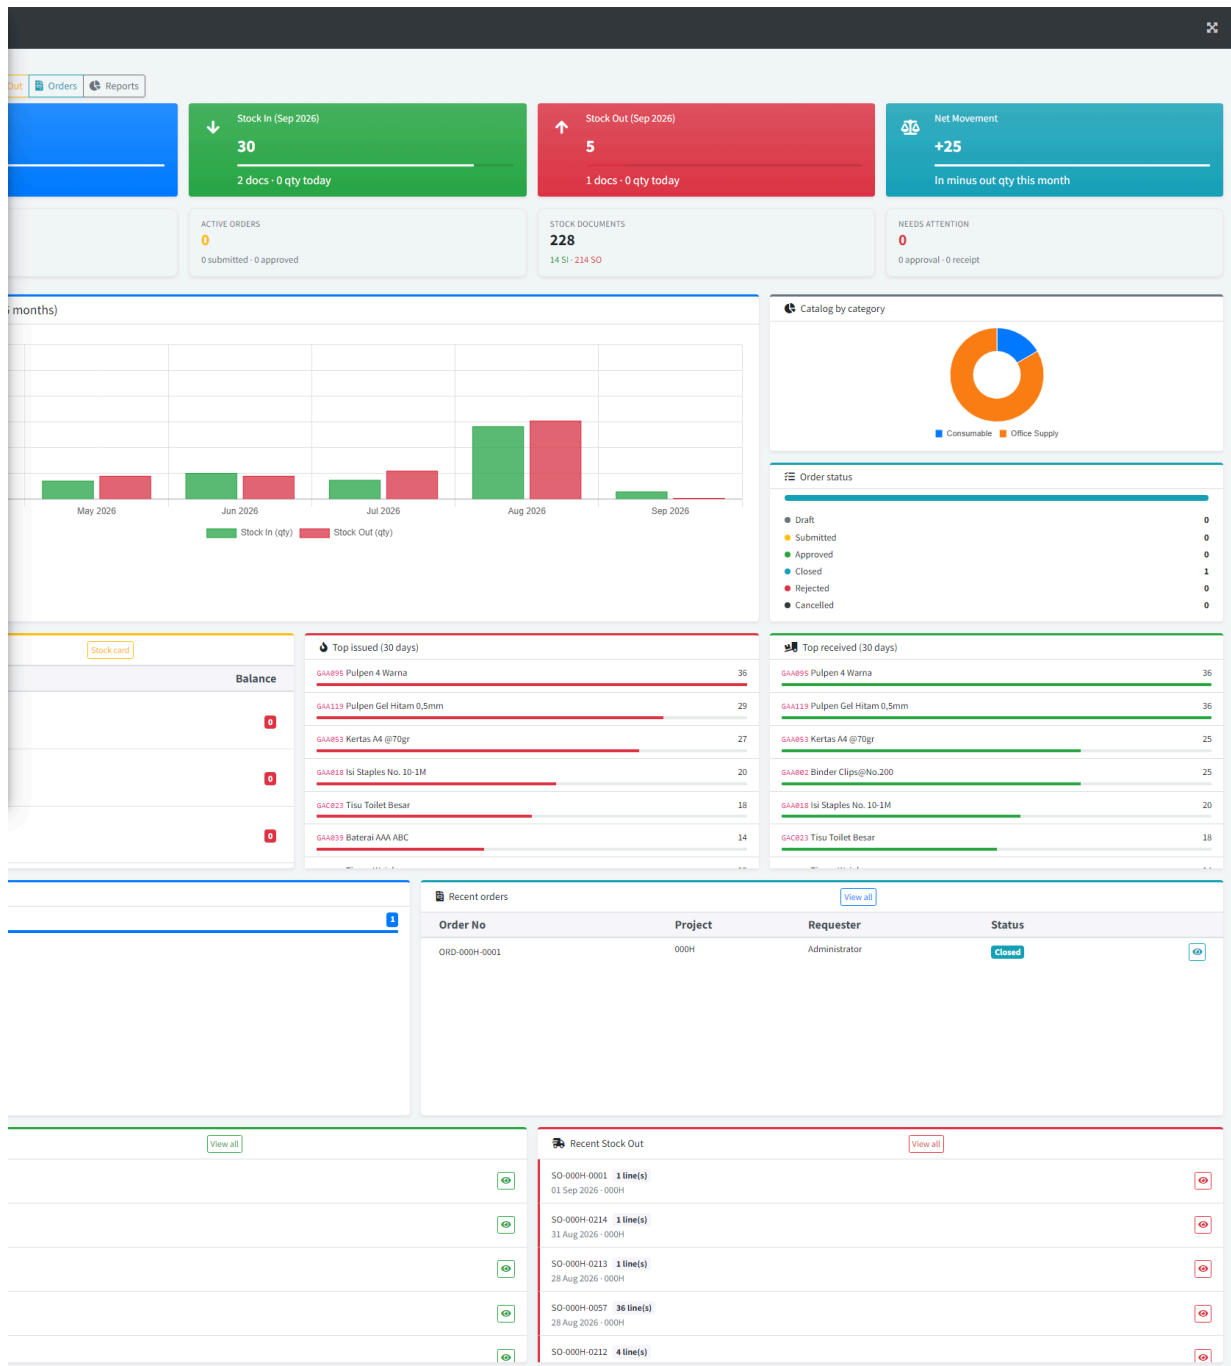

| Menu      | URL                                                                         | Fungsi                                                |
|-----------|-----------------------------------------------------------------------------|-------------------------------------------------------|
| Dashboard | <a href="/dashboard/supplies-management">/dashboard/supplies-management</a> | Ringkasan KPI, grafik, stok rendah, aktivitas terbaru |
| Catalog   | <a href="/supplies/catalog">/supplies/catalog</a>                           | Daftar barang + saldo per project                     |
| Stock In  | <a href="/supplies/stock-ins">/supplies/stock-ins</a>                       | Dokumen barang masuk                                  |
| Stock Out | <a href="/supplies/stock-outs">/supplies/stock-outs</a>                     | Dokumen barang keluar                                 |
| Orders    | <a href="/supplies/orders">/supplies/orders</a>                             | Semua Supply Order (GA)                               |
| Reports   | <a href="/supplies/reports">/supplies/reports</a>                           | Laporan stok & order                                  |

## My Features

| Item Categories | <a href="/supplies/item-categories">/supplies/item-categories</a> | Kategori barang (nama, prefix, deskripsi) |

Gambar 1 — Supplies Dashboard (GAMMA → Supplies → Dashboard)

## 4. Konsep penting

### 4.1 Project dan saldo stok

- Setiap pergerakan stok terikat pada **satu Project** (mis. 000H = HO Balikpapan).
- **Ending balance** hanya terlihat di Catalog setelah Anda memilih **filter Project**.
- Tidak ada dokumen transfer antar project; pindah lokasi fisik tetap dicatat sebagai Stock Out di project asal.

### 4.2 Penomoran dokumen

Nomor unik per project, per jenis dokumen:

| Jenis        | Format                                    | Contoh        |
|--------------|-------------------------------------------|---------------|
| Supply Order | ORD- <b>{projectCode}</b> -- <b>{seq}</b> | ORD-000H-0001 |
| Stock In     | SI- <b>{projectCode}</b> -- <b>{seq}</b>  | SI-000H-0001  |
| Stock Out    | SO- <b>{projectCode}</b> -- <b>{seq}</b>  | SO-000H-0001  |

**seq** = urutan 4 digit per project (0001, 0002, ...).

### 4.3 Status Supply Order

| Status           | Arti                                         |
|------------------|----------------------------------------------|
| <b>Draft</b>     | Masih diedit, belum diajukan                 |
| <b>Submitted</b> | Menunggu approval                            |
| <b>Approved</b>  | Disetujui; siap diterima via Stock In        |
| <b>Rejected</b>  | Ditolak approver                             |
| <b>Cancelled</b> | Dibatalkan pembuat / GA                      |
| <b>Closed</b>    | Selesai (biasanya setelah penerimaan barang) |

**Penting:** Approval **tidak** mengubah stok. Stok baru bertambah setelah GA membuat **Stock In**.

### 4.4 Stock Out — Location & PIC

Setiap baris Stock Out wajib diisi:

- **Location** — tempat pemakaian (teks bebas, mis. "Office Lt. 1", "HCS")
- **PIC** (Person in Charge) — penanggung jawab pemakaian (teks bebas)

Ini **bukan** field Project; Project tetap di header dokumen.

### 4.5 Stok negatif

Sistem **menolak** Stock Out jika saldo tidak cukup, dan **menolak** hapus Stock In jika akan membuat saldo negatif.

## 5. Item Categories (Master Data)

**Menu:** Master Data → Supplies Data → Item Categories

| Field       | Keterangan                         |
|-------------|------------------------------------|
| Name        | Nama kategori (mis. Office Supply) |
| Prefix      | Awalan kode item (mis. GAA) — unik |
| Description | Keterangan opsional                |

| Field  | Keterangan        |
|--------|-------------------|
| Status | Active / Inactive |

**Aturan:**

- Prefix tidak bisa diubah jika kategori sudah punya item di catalog.
- Item baru otomatis mendapat kode `{prefix}{nomor urut 3 digit}` (GAA001, GAA002, ...).

| No | Name          | Prefix | Description                    | Items | Status | Action                                      |
|----|---------------|--------|--------------------------------|-------|--------|---------------------------------------------|
| 1  | Consumable    | GAC    | Consumable goods               | 29    | Active | <a href="#">Edit</a> <a href="#">Delete</a> |
| 2  | Office Supply | GAA    | Stationery and office supplies | 146   | Active | <a href="#">Edit</a> <a href="#">Delete</a> |

Gambar 2 — Item Categories (Master Data → Supplies Data)

## 6. Catalog

**Menu:** GAMMA → Supplies → Catalog

### Melihat saldo

1. Buka halaman Catalog.
2. Pilih **Project** di filter atas tabel.
3. Kolom **Stock In**, **Stock Out**, dan **Ending balance** akan terisi untuk project tersebut.

Tanpa memilih project, kolom saldo kosong — ini perilaku normal.

balance are calculated per project. Select a project below to see quantities.

Item Category: - All - Status: - All - Search: Code, name, description [Reset]

| Name                 | Item Category | Stock unit | Stock In | Stock Out | Ending balance | Status | Action          |
|----------------------|---------------|------------|----------|-----------|----------------|--------|-----------------|

Gambar 3 — Catalog dengan filter Project terpilih

## Menambah item

1. Klik **Add**.
2. Isi: Item Category, Name, Description, Stock unit (mis. **pcs**, **box**).
3. Kode item di-generate otomatis dari prefix kategori.
4. Simpan.

## Import / Export Excel

- **Export** — unduh daftar catalog saat ini.
- **Import** — unggah Excel sesuai template (**Template** tersedia di modal Import).
- Kolom template: **code**, **category\_prefix**, **name**, **description**, **stock\_unit**, **status**.
- Jika **code** sudah ada → baris tersebut di-update; jika kosong → item baru dibuat.

## Edit / Nonaktifkan

- Edit nama, deskripsi, satuan, status.
- Item yang sudah punya pergerakan stok **tidak bisa dihapus** (gunakan status Inactive).

## 7. Stock In

**Menu:** GAMMA → Supplies → Stock In

Mencatat barang **masuk** ke project (pembelian, donasi, saldo awal cutover, penerimaan dari Supply Order).

Stock In Home / Supplies / Stock In

Gambar 5 — Form buat Stock In (multi-line)

### Stock In dari Supply Order (penerimaan)

1. Buka Supply Order berstatus **Approved**.
2. Klik aksi **Receive** / buat Stock In dari order.
3. Form terisi baris order; qty bisa diterima sebagian (partial receipt).
4. Simpan Stock In — qty diterima terhubung ke baris order.

Setelah semua barang diterima, GA dapat **Close** order dari halaman detail order.

### Melihat & cetak

- Klik nomor dokumen untuk detail (header + semua baris).
- **Print** untuk versi cetak.

Items Issued

1 line(s)

| No    | Code   | Name       | Description | Qty out | Location     | PIC     |
|-------|--------|------------|-------------|---------|--------------|---------|
| 1     | GAC001 | Gula Pasir | Gulaku@1kg  | 1       | Office Lt. 1 | Sudarti |
| Total |        |            |             | 1       |              |         |

Gambar 9 — Detail Stock Out

Tips

- Satu dokumen bisa multi-baris (beberapa item sekaligus).
- Jika qty ditolak, cek saldo di Catalog untuk project yang sama.

9. Supply Order

9.1 My Office Supply Orders (karyawan)

**Menu:** My Features → My Office Supply Orders

Untuk meminta pengadaan **Office Supply (GAA)** saja.

My Office Supply Orders Home / My Office Supply Orders

Office supply orders you created + Add

| No ↑↓ | Order No ↑↓   | Project                | Date ↑↓    | Department              | Status | Action |
|-------|---------------|------------------------|------------|-------------------------|--------|--------|
| 1     | ORD-000H-0001 | 000H - HO - Balikpapan | 01/09/2026 | Human Capital & Support | Closed |        |

Showing 1 to 1 of 1 entries

Previous **1** Next

Gambar 10 — My Office Supply Orders (My Features)

#### Alur:

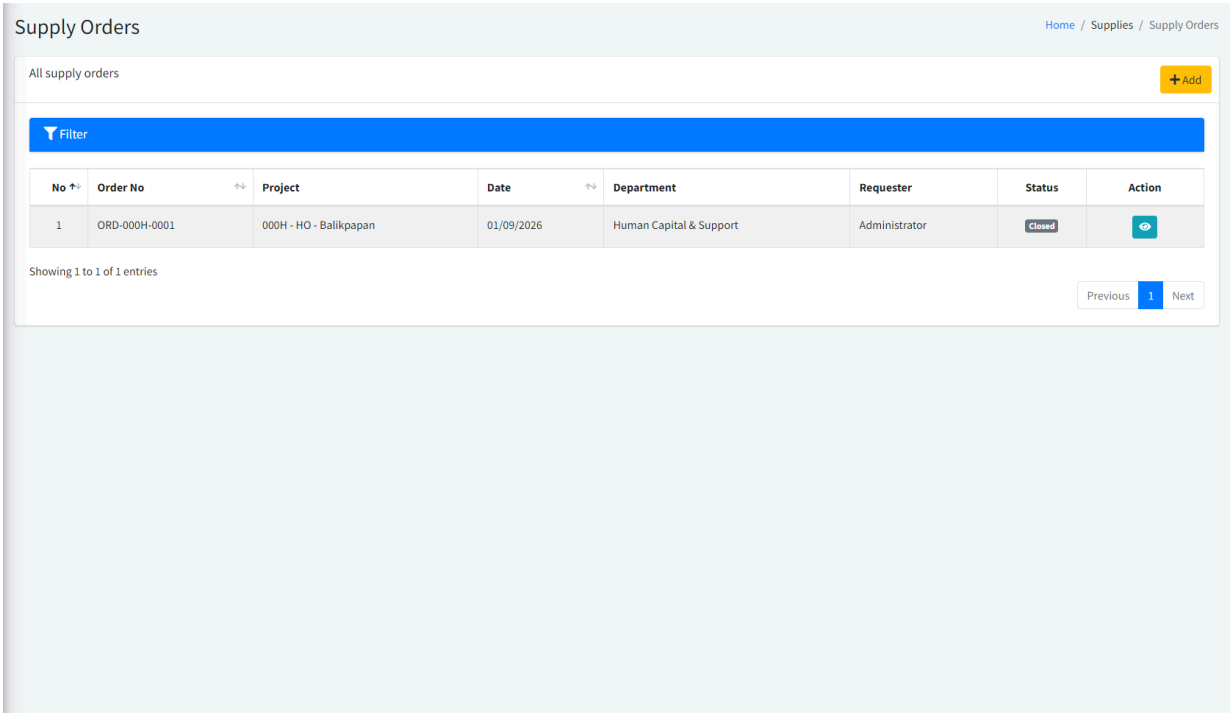

1. **Create** — isi tanggal, department (otomatis dari data Anda), baris item + qty + remarks.
2. **Save** — status **Draft**.
3. Pilih **manual approvers** (sama seperti modul approval lain).
4. **Submit for Approval** — status **Submitted**.
5. Tunggu approval di menu **Approval Requests**.
6. Setelah **Approved**, GA akan menerima barang via Stock In.
7. Anda bisa **Cancel** selama masih Draft atau Submitted.

#### Catatan:

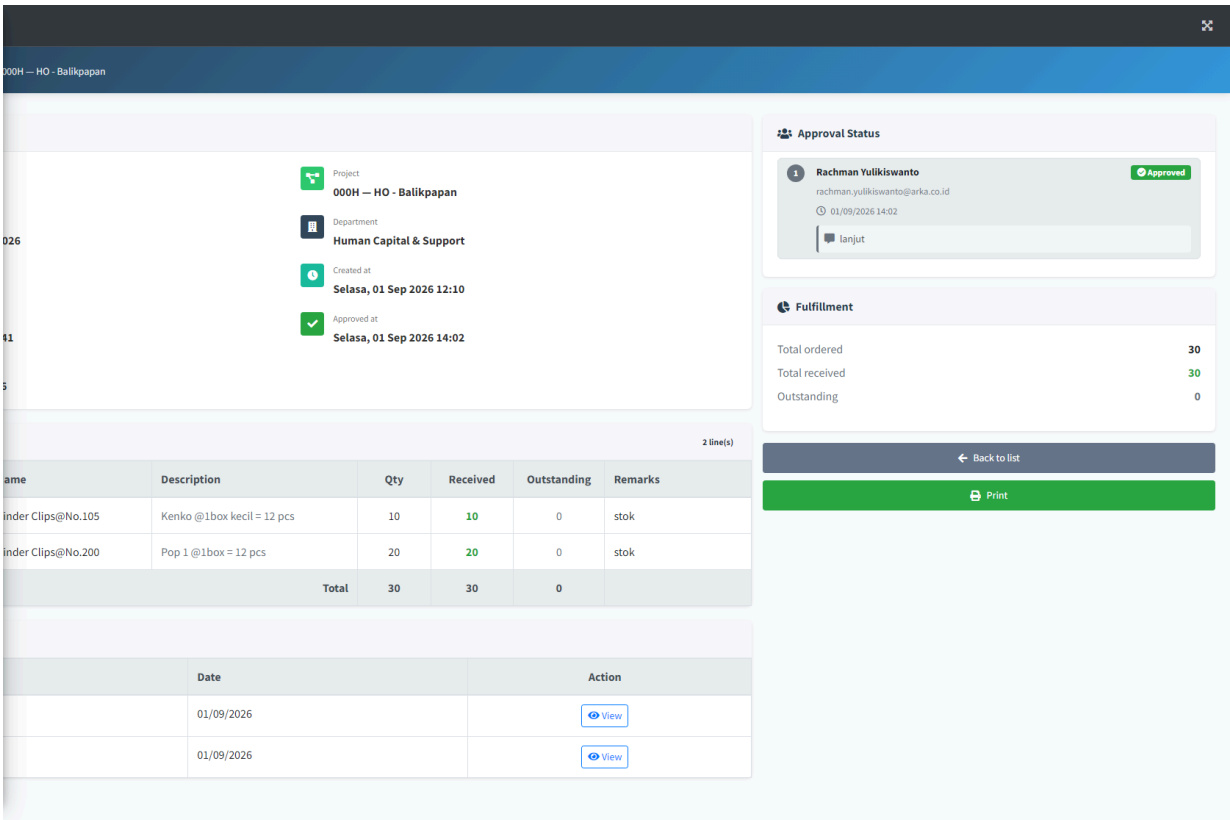

- Project mengikuti **administration aktif** Anda — tidak ada pilihan project manual.
- Hanya item kategori Office Supply (GAA) yang bisa dipilih.

## 9.2 Supply Orders (GA / HCS)

**Menu:** GAMMA → Supplies → Orders

Gambar 11 — Supply Orders (GA / HCS)

Gambar 12 — Detail Supply Order

Sama seperti order karyawan, tetapi:

- Bisa membuat order untuk semua kategori item (GAA + GAC).
- Melihat semua order di project yang Anda akses.
- Bisa **Close** order yang sudah Approved setelah penerimaan selesai.

9.3 Partial receipt

Order bisa diterima bertahap:

- Stock In pertama: terima sebagian qty.
- Stock In berikutnya: sisa qty.
- Laporan **Order Fulfillment Gap** menampilkan qty yang belum diterima.

## 10. Dashboard Supplies

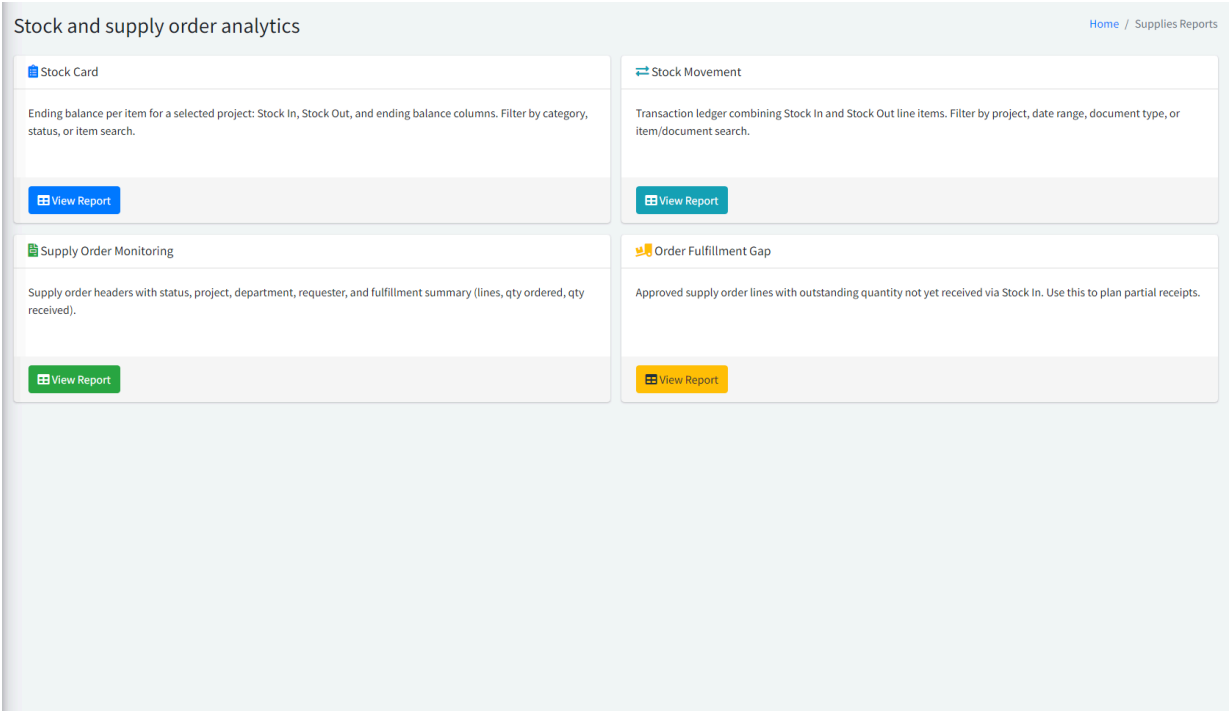

**Menu:** GAMMA → Supplies → Dashboard

**URL:** </dashboard/supplies-management>

Ringkasan untuk GA:

| Bagian                  | Isi                                                  |
|-------------------------|------------------------------------------------------|
| KPI cards               | Jumlah catalog, Stock In/Out bulan ini, net movement |
| Grafik 6 bulan          | Trend qty masuk vs keluar                            |
| Low stock ( $\leq 10$ ) | Item saldo rendah di project scope Anda              |
| Top issued / received   | Barang paling sering keluar / masuk (30 hari)        |
| Top projects            | Project dengan order terbanyak                       |
| Recent orders / SI / SO | Aktivitas terbaru (area scroll)                      |

**Quick actions** di atas dashboard: Catalog, Stock In, Stock Out, Orders, Reports.

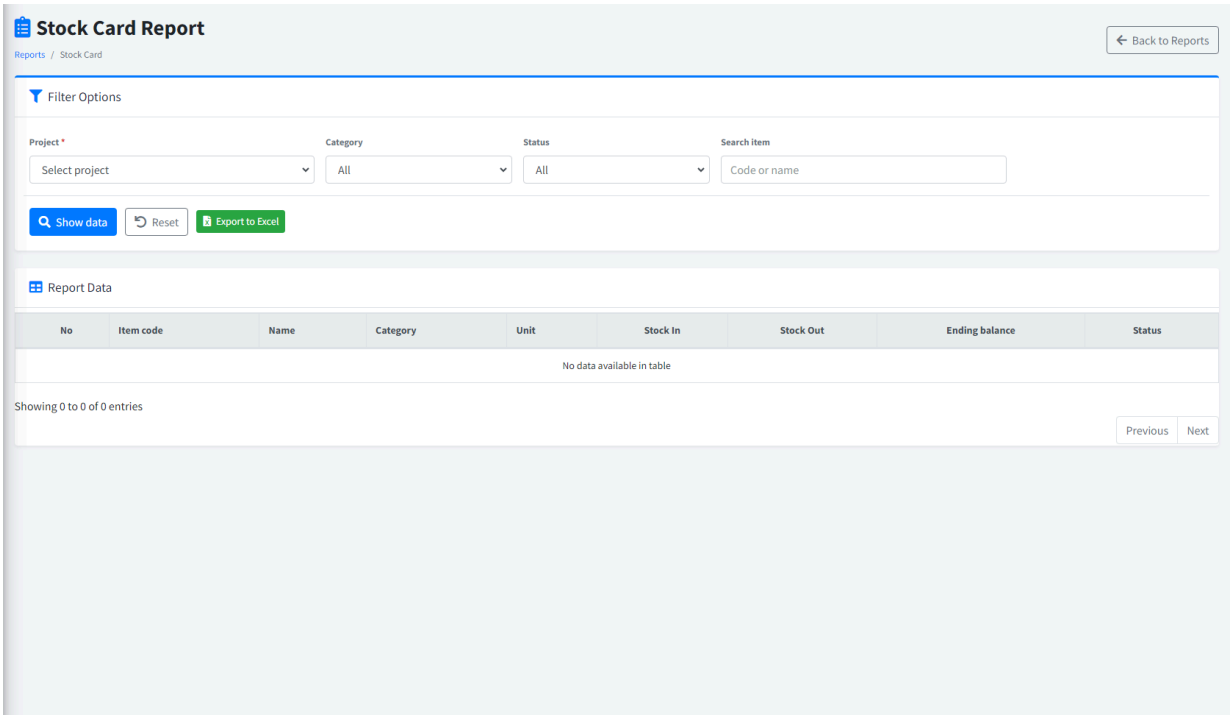

Gambar 13 — Menu Reports

## 11. Laporan (Reports)

**Menu:** GAMMA → Supplies → Reports

| Laporan                 | Kegunaan                                                               |
|-------------------------|------------------------------------------------------------------------|
| Stock Card              | Saldo akhir per item per project (Stock In, Stock Out, ending balance) |
| Stock Movement          | Buku besar transaksi: semua baris SI & SO dengan filter tanggal        |
| Supply Order Monitoring | Daftar order + status + ringkasan penerimaan                           |
| Order Fulfillment Gap   | Baris order Approved yang qty-nya belum lunas diterima                 |

Semua laporan mendukung **filter** (project, tanggal, kategori, pencarian) dan **Export** ke Excel.

Gambar 14 — Laporan Stock Card

## 12. Alur kerja lengkap (contoh)

### Skenario A — Karyawan minta ATK

Karyawan: buat My Office Supply Order (Draft)  
→ Submit + pilih approver  
Approver: approve di Approval Requests  
GA: buat Stock In dari order (partial atau full)  
GA: Close order

### Skenario B — GA catat pemakaian harian

Karyawan ambil barang dari lemari (di luar sistem)  
GA: buat Stock Out (item, qty, location, PIC)

Saldo catalog project berkurang

### Skenario C — GA beli consumable tanpa order

GA: buat Stock In langsung (tanpa link order)  
Saldo catalog project bertambah

### Skenario D — Cek stok sebelum order

GA: buka Catalog → pilih Project 000H  
GA: lihat Ending balance per item  
GA: buat Supply Order jika perlu restock (meski saldo > 0)

---

## 13. FAQ & pemecahan masalah

### Catalog saldo kosong semua?

Pilih **Project** di filter Catalog. Saldo selalu per project.

### Stock Out ditolak "insufficient balance"?

Saldo item di project tersebut tidak cukup. Cek Catalog atau laporan Stock Card.

### Order sudah Approved tapi stok belum naik?

Normal. Buat **Stock In** dan hubungkan ke order tersebut.

### Saya tidak melihat menu Supplies?

Permission belum diberikan. Hubungi administrator untuk role GA/HCS.

### My Office Supply Orders tidak bisa pilih item GAC?

By design — menu personal hanya untuk **Office Supply (GAA)**. Consumable diorder oleh GA melalui **Supplies → Orders**.

### Bisakah mengubah nomor dokumen?

Tidak. Nomor **ORD-**, **SI-**, **SO-** di-generate sistem.

### Data awal dari Excel lama?

Saat go-live, GA menjalankan **cutover seed** sekali dari workbook Excel (Katalog + Masuk + Keluar). Setelah itu semua transaksi baru lewat aplikasi.

---

## 14. Glosarium singkat

| Istilah              | Arti                                                         |
|----------------------|--------------------------------------------------------------|
| Catalog              | Master daftar barang                                         |
| Ending balance       | Saldo akhir = total Stock In – total Stock Out               |
| Opening balance      | Saldo awal saat cutover (dicatat sebagai Stock In pembukaan) |
| Project              | Lokasi kepemilikan stok (mis. 000H)                          |
| Location (Stock Out) | Tempat pemakaian baris keluar — bukan project                |
| PIC                  | Penanggung jawab pemakaian pada baris Stock Out              |
| Partial receipt      | Penerimaan order tidak harus sekaligus                       |

## 15. Kontak & dukungan

Untuk masalah akses, permission, atau data awal cutover, hubungi **tim GA/HCS** atau **administrator sistem ARKA HERO**.

Untuk permintaan fitur baru, dokumentasikan kebutuhan bisnis dan ajukan ke tim pengembang dengan merujuk modul **Supplies** di ARKA HERO.
